### Application area

- Machinery construction
- Chemical and petrochemical industry
- General process technology

### Features

- Gas expansion thermometer for surface temperature measurement on pipes
- Simple mounting without thermowell
- Nominal ranges -40 °C...250 °C
- High quality case with bajonet ring NS 100/160, degree of protection IP 66
- Case and wetted parts of stainless steel
- Accuracy class 1 per EN 13190 when insulated in the plant
- Micro adjusting pointer for indication correction
- Design:
  - bulb fixed welded
  - indicating unit positioning by rotating the bulb
  - with capillary (indicating unit independent of measuring point)

### Options

- Approvals/Certificates
  - Explosion protection (ATEX/UKEX) for mechanical devices
  - Calibration certificate as per EN 10204
- As per UKCA regulations
- Case with liquid filling
- Electronical angle-of-rotation sensor, Type series PL1100, see data sheet D6-020

### Application

These thermometers are suitable for use outdoors and in aggressive environments. Gas expansion thermometers with clip-on bulb offer some benefits to the user:

- no change in pipeline cross-section; the line thus remains piggable and retrofitting
- can be carried out without interfering with the process
- simple mounting

If the exact orientation of the indication is not known before mounting, we recommend using the positionable version. With this version the case may be re-positioned once by  $\pm 180^\circ$  with respect to the pipeline.

## Technical data

### Constructional design / case

Design:	High quality case with bajonet ring, material: stainless steel mat.-no. 1.4301 (304)								
Nominal size:	NS 100 or NS 160								
Degree of protection per EN 60529:	IP 66								
Case filling:	Labofin Further filling liquids upon request.								
Case seal:	Material gasket: NBR								
Window:	Non-splintering laminated glass. Option: non-splintering plastic (Macro-lon) with adjustable reference pointer								
Movement:	Stainless steel with compensation								
Scale:	Pure aluminium, white with black inscription. Alternatively with marking or fixed reference pointer.								
Pointer:	Pure aluminium, black with micro adjustment for zero point correction								
Mounting:	<b>For design with capillary only:</b> Stand-alone mounting with wall bracket per DIN 16281, alternatively with flange for surface mounting or for flush mounting with DIN mounting flange.								
Weights:	NS 100: <table border="1"><tr><td>Without filling:</td><td>approx. 0.8 kg</td></tr><tr><td>With filling:</td><td>approx. 1.2 kg</td></tr></table> NS 160: <table border="1"><tr><td>Without filling:</td><td>approx. 1.4 kg</td></tr><tr><td>With filling:</td><td>approx. 2.0 kg</td></tr></table>	Without filling:	approx. 0.8 kg	With filling:	approx. 1.2 kg	Without filling:	approx. 1.4 kg	With filling:	approx. 2.0 kg
Without filling:	approx. 0.8 kg								
With filling:	approx. 1.2 kg								
Without filling:	approx. 1.4 kg								
With filling:	approx. 2.0 kg								

### Process connection

Design:	Clip-on temperature detecting element, bottom or centre back connection, alternatively with capillary. Optional with screwing for one-off positioning of indicating unit (rotatable temperature detecting element).
---------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### Measuring element

Measuring element:	Bourdon tube, dead zone free with noble gas filling.
--------------------	------------------------------------------------------

### Temperature sensor

Temperature-detecting element:	Adapted to pipe or circle form, suitable for clamp mounting for diameters of approx. 25 to 150 mm. Further diameters upon request.
--------------------------------	------------------------------------------------------------------------------------------------------------------------------------

### Capillary

Capillary (optional):	Available in different lengths, alternatively coated with protective tube Material: stainless steel mat.-no. 1.4571 (316Ti)
-----------------------	--------------------------------------------------------------------------------------------------------------------------------

### Nominal range

Nominal range (EN 13190):	-40 °C...250 °C. Measuring spans $\geq 60$ °C. See order details, further upon request. Alternatively extension of measuring range to the complete nominal range.
---------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### Accuracy

Accuracy class:	1.0 per EN 13190
-----------------	------------------

### Temperature ranges

Ambient:	Per EN 13190. Ambient temperatures that deviate from EN are to be specified.
Storage and transport:	-20...60 °C Further temperature ranges upon request.

### Tests and certificates

Explosion protection:	Ex-protection (ATEX/UKEX) for mechanical devices ⊕ II 2G Ex h IIC T1...T6 Gb X ⊕ II 2D Ex h IIIC Txx°C Db X
-----------------------	-------------------------------------------------------------------------------------------------------------------

Further details and temperature limits see Ex Instruction XA\_005.

### Instructions for use

The loading capacity of the temperature detecting element depends on the following parameters:

- Media
- Media pressure
- Media temperature
- Flow velocity
- Insertion length
- Material

A technical examination might be necessary.

**Information on other models see order details or upon request.**

Further information to mounting and operation see Operating Instruction BA\_017.

# Dimensions

## Version with fast welded connection

## Version with positionable connection

clip-on temperature detecting element rotatable by  $\pm 180^\circ$  with respect to indicator.

## Orientation to temperature detecting element

## Mounting and operating instructions

The clip-on temperature detecting element should be insulated when mounted on piping. For further information see operating instruction BA\_017.

**Positionable version:** When the clip-on temperature detecting element has been mounted on the pipeline, the case may be rotated (re-positioned) once by  $\pm 180^\circ$  with respect to the pipeline, by loosening the screwing

## Order details

### Gas expansion thermometer with clip-on bulb Type series FN....
