L-LAS Series

▶ L-LAS-RL-30-...

- Various optical fibers available (W=white light filter, R=red light filter, B=blue light filter, UV=black filter)
- Ring illumination with 9 LED
- Reference distance 75 mm
- Working distance 75 mm ± 5 mm
- Working range typ. 30 mm
- Resolution typ. 30 µm
- Minimal detectable object typ. 0.15 mm
- CCD line detector, 512 pixel (1024 subpixel)
- External TEACH/RESET push-button
- RS232 interface (USB or Ethernet adapter available)
- 1 digital input (IN0), 3 digital outputs (OUT0...OUT2)
- 2 analog outputs (0...+10V and 4...20mA)
- Switching state indication via 5 LED (1x green, 2x red, 2x yellow)
- Scratch-resistant optics cover made of glass
- Detection of position or width of the measuring object in reflected light operation

Picture: L-LAS-RL-30-W

Design

Product name:

- L-LAS-RL-30-W** (with white light filter)
- L-LAS-RL-30-R** (with red light filter)
- L-LAS-RL-30-B** (with blue light filter)
- L-LAS-RL-30-UV** (with UV filter)
- incl. Windows® software L-LAS-RL-Scope

Mounting accessories: (p. 7)

- FL-34** (flange)
- WFL-34** (flange)

Technical Data

Model	L-LAS-RL-30-...
Reference distance	75 mm
Working distance	75 mm ± 5 mm
Measuring range	typ. 30 mm
Resolution	typ. 30 µm
Reproducibility	typ. ± 90 µm
Min. detectable object	typ. 0.15 mm
Light source	L-LAS-RL-30-W: Ring illumination comprising 9x white light LED, diffuse L-LAS-RL-30-R: Ring illumination comprising 9x red light LED, diffuse L-LAS-RL-30-B: Ring illumination comprising 9x blue light LED, diffuse L-LAS-RL-30-UV: Ring illumination comprising 9x UV-LED
Optical filter	L-LAS-RL-30-W: white light filter L-LAS-RL-30-R: red light filter L-LAS-RL-30-B: blue light filter L-LAS-RL-30-UV: blackfilter
Optical diffusor	L-LAS-RL-30-R, L-LAS-RL-30-B, and L-LAS-RL-30-W: Surface diffusor screen
Digital outputs 3x (OUT0 ... OUT2)	pnp bright-switching/npn dark-switching or pnp dark-switching/npn bright-switching, adjustable under Windows®, 100 mA, short-circuit proof
Analog outputs 2x	1x voltage (0 ... +10V), 1x current (4 ... 20mA)
Digital input 1x (IN0)	Input voltage +Ub/0V, with protective circuit IN0: EXT TRIGGER
Output polarity	bright/dark-switching, can be switched under Windows®
Voltage supply	+24 VDC (± 10%)
Current consumption	< 220 mA
Enclosure rating	Electronics: IP64, optics: IP67
Sensitivity setting	adjustable under Windows® via PC
Ambient light	up to 3000 Lux
Intensity correction	adjustable under Windows® via PC
Operating temperature range	-10°C ... +60°C
Storage temperature range	-20°C ... +85°C
Housing material	aluminum, anodized in blue optics holding device: aluminum, anodized
Housing dimensions	Length 133 mm x Ø 32 mm (threaded M34x1.5) or Ø 34 mm (optics holding device), without connectors
Type of connector	8-pole circular female connector type Binder Series 712 (PLC/Power), 4-pole circular female connector type Binder Series 707 (PC/RS232)
Connecting cables	Connection to PC: cab-las4/PC or cab-las4/PC-w or cab-las4/USB or cab-las4/USB-w Connection to PLC: cab-las8/SPS or cab-las8/SPS-w
LED display	LED red (-) : Measuring value < lower tolerance threshold LED green : Measuring value within tolerance window LED red (+) : Measuring value > upper tolerance threshold (middle) LED yellow: Multifunctional LED LED yellow: Power LED
EMC test acc. to	DIN EN 60947-5-2
Scan frequency	max. 500 Hz
Interface	RS232, parameterizable under Windows®

Dimensions

Connector Assignment

Connection to PLC:

8-pole fem. connector Binder Series 712

Pin:	Color:	Assignment:
1	white	GND (0V)
2	brown	+24VDC ($\pm 10\%$)
3	green	IN0 (EXT TRIGGER)
4	yellow	OUT0 (-)
5	grey	OUT1 (OK)
6	pink	OUT2 (+)
7	blue	I _{OUT} (4...20mA)
8	red	Analog (0...+10V)

Connecting cable:
 cab-las8/SPS-(length)
 cab-las8/SPS-w-(length) (angle type, 90°)
 (standard length 2m)

cab-las8/SPS-...
 (max. length 25m, outer jacket: PUR)

cab-las8/SPS-w-...
 (max. length 25m, outer jacket: PUR)

Connection to PC:

4-pole fem. connector Binder Series 707

Pin:	Assignment:
1	+24VDC (+Ub, OUT)
2	GND (0V)
3	RxD
4	TxD

Connection via RS232 interface at the PC:

Connecting cable:
 cab-las4/PC-(length)
 cab-las4/PC-w-(length) (angle type 90°)
 (standard length 2m)

alternative:

Connection via USB interface at the PC:

Connecting cable (incl. driver software):
 cab-las4/USB-(length)
 cab-las4/USB-w-(length) (angle type 90°)
 (standard length 2m)

alternative:

Connection to local network via Ethernet bus:

Adapter (based on Lantronix XPortModul):
 SI-RS232/Ethernet-4-(length)
 (standard length 2m)

cab-las4/PC-...
 (max. length 10m, outer jacket: PUR) or
 cab-las4/PC-w-... (no picture)
 (max. length 5m, outer jacket: PUR)

SI-RS232/Ethernet-4-...
 (length 0,5m, 1m, or 2m,
 outer jacket: PUR)

cab-las4/USB-... or
 cab-las4/USB-w-... (no picture)
 (each max. length 5m, outer jacket: PUR)

Measuring Principle

Measuring principle of the L-LAS-RL-20:

The sensors of the L-LAS-RL series are line sensors that operate according to the reflected light (RL) principle. The measuring object is illuminated by means of a ring illumination unit comprising 9 red light LED, blue light LED, or white light LED (followed by an optical diffuser) or 9 UV-LED. The intensity of this ring illumination automatically adjusts itself to the surface properties (light-adaptive setting).

An optics unit reproduces the light that is scattered back from the object surface on a CCD line. A micro-controller then evaluates the intensity information (video signal) coming from the measuring object.

The scan frequency is approx. 500 Hz.
 Several evaluation modes are available.
 At an optimal object distance of 85 mm the sensor has a working range of approx. 30 mm.
 The resolution is typ. 30 µm (CCD with 512 pixel, 1024 subpixel).
 The smallest detectable measuring object is typ. 0.15 mm.

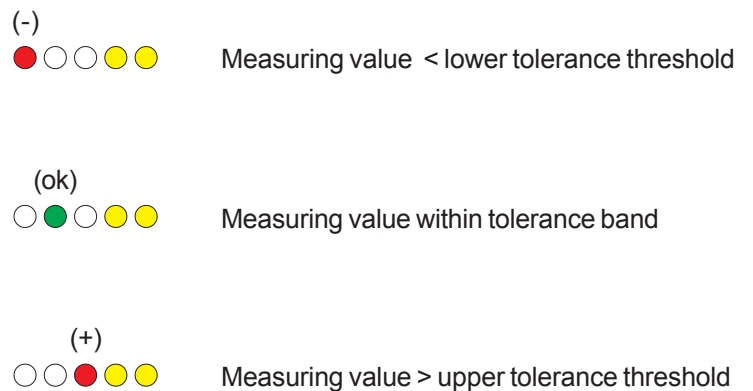

The L-LAS-RL sensor can be connected to the PLC by way of an 8-pole circular female connector. A 4-pole circular female connector can be used to connect the sensor to the serial interface of a PC. The sensor can be parameterised with the L-LAS-RL-Scope Windows software.

The L-LAS-RL sensor features a digital input IN0 (trigger) and three digital switching outputs OUT0 - OUT2, as well as two analog outputs. Outputs OUT0 (-), OUT1 (OK), and OUT2 (+) are used to output the actual value / setpoint value comparison (measurement value higher than setpoint range, measurement value within setpoint range, measurement value lower than setpoint range). The two analog outputs (1x voltage output 0...+10V, 1x current output 4...20mA) can be used to send the current measurement value to the PLC with 12-bit resolution.

LED Display

LED display:

The current measurement value is visualised by way of three LEDs (red/green/red) at the sensor housing. The switching state that is indicated at the LED display also is applied at the digital outputs OUT0, OUT1, and OUT2.

Windows® Software

Windows® software L-LAS-RL-Scope:

The L-LAS-RL-... sensor can be easily parameterized with the help of the Windows® user interface. For this purpose the sensor is connected to the PC by way of the cab-las4/PC (or cab-las4/USB or SI-RS232/Ethernet-4) interface cable.

When parameterization is finished, the PC can be disconnected again (press STOP button), the sensor system continues to operate with the current parameters in STAND-ALONE mode without a PC.

Mounting Accessories

FL-34 (flange):

Example:
FL-34 with
sensor mounted

WFL-34 (flange, angle type 90°):

Example:
WFL-34 with
sensor mounted

(All dimensions in mm)
