

# Overview

## Description

The P293 is a stainless-steel float-type level switch designed for high-temperature applications, capable of operating in liquids up to 180°C (356°F). Its side-threaded design allows for easy installation on tanks of varying depths, making it suitable for diverse industrial environments.

## Technical Parameters

<b>Material</b>	Stem	SUS304
	Float	SUS304
	Stopper	SUS304
	Nat	SUS304
<b>Specifications</b>	Temperature Range (Atmospheric)	-40°C~+180°C
	Pressure Resistance (Room Temperature)	0.5MPa
	Float Specific Gravity	0.7±0.05
<b>Electric Specs</b>	Maximum Contact Capacity	50W DC/AC
	Maximum Voltage	300V DC/AC
	Maximum Current	0.5A DC/AC
	Wire Length	300mm Standard (Custom lengths available)
