

Overview

Description

The P305 is a float-type level switch designed for precise liquid level detection in various industrial applications. Its lightweight, oil-resistant construction ensures reliable performance in environments with temperatures ranging from -10°C to 80°C.

Technical Parameters

Material	Stem	POM
	Float	NBRFoamed
	Stopper	SUS304 (P.P.)
	Nat	POM
Specifications	Temperature Range (Atmospheric)	-10°C~+80°C
	Pressure Resistance (Room Temperature)	0.2MPa
	Float Specific Gravity	0.47±0.05
Electric Specs	Maximum Contact Capacity	50W DC/AC
	Maximum Voltage	300V DC/AC
	Maximum Current	0.5A DC/AC
	Wire Length	300mm Standard (Custom lengths available)
