

Overview

Description

The P310 is a compact float-type level switch designed for efficient liquid level control in confined spaces. Its durable polypropylene construction ensures compatibility with various liquids, making it suitable for diverse industrial applications.

Technical Parameters

Material	Stem	P.P.
	Float	P.P.Foamed
	Stopper	SUS304 (P.P.
	Nat	P.P.
Specifications	Temperature Range (Atmospheric)	-10°C~+80°C
	Pressure Resistance (Room Temperature)	0.2MPa
	Float Specific Gravity	0.65±0.05
Electric Specs	Maximum Contact Capacity	50W DC/AC
	Maximum Voltage	300V DC/AC
	Maximum Current	0.5A DC/AC
	Wire Length	300mm Standard (Custom lengths available)
