

# Overview

## Description

The P312 is a float-type level switch designed for precise liquid level detection in various industrial applications. Its plastic housing and union-type design allow for easy installation and compatibility with extension pipes to accommodate different liquid levels.

## Technical Parameters

<b>Material</b>	Stem	POM
	Float	NBRFoamed
	Stopper	SUS304 (P.P.)
	Nat	POM
	Union Nat	POM
	Union Sleeve	POM
<b>Specifications</b>	Temperature Range (Atmospheric)	-10°C~+80°C
	Pressure Resistance (Room Temperature)	0.2MPa
	Float Specific Gravity	0.47±0.05
<b>Electric Specs</b>	Maximum Contact Capacity	50W DC/AC
	Maximum Voltage	300V DC/AC
	Maximum Current	0.5A DC/AC
	Wire Length	300mm Standard (Custom lengths available)
