

Overview

Description

The P313 is a versatile float-type level switch designed for precise liquid level detection in various industrial applications. Its corrosion-resistant plastic housing and adaptable design make it suitable for diverse environments.

Technical Parameters

Material	Stem	P.P.
	Float	P.P.Foamed
	Stopper	SUS304 (P.P.)
	Nat	P.P.
	Union Nat	P.P.
	Union Sleeve	P.P.
Specifications	Temperature Range (Atmospheric)	-10°C~+80°C
	Pressure Resistance (Room Temperature)	0.2MPa
	Float Specific Gravity	0.7±0.05
Electric Specs	Maximum Contact Capacity	50W DC/AC
	Maximum Voltage	300V DC/AC
	Maximum Current	0.5A DC/AC
	Wire Length	300mm Standard (Custom lengths available)
