

M-Series Humidity/-temperature compact sensors with cable or plug-in connection

Miniature sensors / for assembly in non-visible areas

These sensors are especially adapted to the requirements of measurement tasks which only have limited space available. They are suitable for measuring the relative humidity and temperature in air and other non-aggressive gases. Using the sensors for outdoor applications is not recommended.

The sensors are based on our miniature sensors in the calHT series (product info B1.10). They are fitted with a filter and a 4-pin plug (MCK...4S0) or with a permanently connected 1.5 m long cable (MC(P)K...1Kn). Suitable cables for the model MCK...4S0 can be supplied in different lengths as an option.

The sensors feature high long-term stability, small hysteresis and good dynamic performance.

Technical Data

Humidity

measuring range 0...100%rh
 resolution 0.5%rh
 accuracy $\pm 2.5\%$ rh (10...40 °C, 10...90 %rh) ± 1 digit
 other range $\pm 5\%$ rh ± 1 digit
 influence of temperature $\pm 0.1\%$ rh/K for < 10 °C and > 40 °C

Temperature

measuring ranges colour code
 resolution 0.125 °C
 accuracy ± 0.5 K @ 23 °C ± 1 digit
 (details see diagramm)

General data

operating voltage 5...30 V DC
 output signal :
 MC(P)K1 2 x 0...1 V (at RL \geq 100 k Ω)
 MC(P)K6 digital (similar I²C)
 I²C-bus-voltage 3.3 VDC
 storage temperature -40...85°C
 working temperature -40...85°C
 working temperature (with permanent cable) -20...70°C
 power consumption < 250 μ A

degree of protection
 sensor with PTFE filter ZE05 IP40/IP64 (cable versions)
 sensor with protective basket ZE07 IP00
 sensor with protective basket ZE08 IP30

Maximum cable lengths:
 MC(P)K1 5 m at RL \geq 100kOhm ¹⁾
 MC(P)K6 0.5m at a clock rate f = 100kHz ¹⁾

1) longer cables possible depending on the load or clock rate

Series	Compact sensors	M
Design	with tube extension	P
	direct connection plug or cable	C
Physical output	rel.humidity and temperature	K
Output signal	0..1 V	1
	I ² C	6
Special edition	none	00
	seal for increased requirements	0S
Measuring range H	0...100 % r.h.	F1
Measuring range T	-30...70 °C	37
	-20...80 °C	28
	0...100 °C	01
	-40...60 °C	46
	-40...85 °C (I ² C)	48
Operating voltage	5...30 VDC	5
Filter	PTFE filter ZE05	05
	open ZE07 (standard)	07
	with membrane ZE08	08
Type of connection and characteristics of the design	4-pin plug	4S0
	permanent cable 0,5 m	0K(n)
	permanent cable 1,5 m	1K(n)
	special lengths of cable in m	yy(n)
	other specialities of design	Xyy

n: additional tube extension depending on sensor type and special design
 (n) = 0: no tube extension
 (n) = 1: total length sensor 53 mm
 (n) = 4: total length sensor 95 mm

Special versions available on request.

User instructions

Install the sensors at a place in the room where characteristic levels of humidity occur. Avoid installing them close to heaters or windows or against outside walls.

In general, the sensors are maintenance-free. If the PTFE filter is contaminated with dust, grease and oils, this can have a negative impact on the dynamic behaviour. In this case the sensor head of the plug version needs to be disconnected from the cable and to be cleaned by blowing or carefully rinsing off with distilled water. After removing the filter, make sure that the sensitive sensor surface is not touched, as this can lead to irreparable damage. An exact measured value can only be attained again after being completely dried; this also applies to condensation.

Please consult „**application instructions for the sensing elements**“ (product info sheet no. A 1) for further information.

Working range of humidity and temperature

 Operating the sensor in these areas can damage it!

Temperature accuracy of the sensors
